#### Six Ballots For East Liverpool Electors

When East Liverpool voters go to the polls two weeks from today, they will be handed six ballots, containing names of candidates for municipal, township and board of education places, two city issues and two state proposals.

The ballots are:

- 1-Municipal, listing Republican, Democratic and independent candidates for all offices from mayor down to ward councilman as well as municipal court clerk.
- 2-Township, containing the names of candidates for three places on the board of township trustees. 3-Board of education, listing seven candidates for the three
- places to be filled. 4-Referendum on councilmanic ordinance prohibiting the sale and use of firecrackers.
- 5-Proposed one-mill tax levy for the purpose of paying the salaries of 15 additional firemen.
- 6-State proposal, containing referendum and initiative

Electors should begin to study the qualifications of the candidates and the purposes of the special propositions, so that they can vote intelligently when they visit the precinct places to exercise their duty as well as their privilege as citizens.

### The Useful Mr. Babbitt

Merle Thorpe, editor of Nation's Business, has no sympathy with "Babbitt-baiters." He points out that business today is so complex that the individual business man, in order to get along, has to join a group. Moreover, he shows the extremely valuable results of such group-activity, to everybody concerned.

The British trade investigators who came to this country a few months ago, he remarks, were amazed at the way competitors in this country get together. In England it is no uncommon thing to find rivals in business who have not spoken to each other for years. Here rivals talk things over for their mutual benefit. Abroad they suspect and avoid each other. "That explains why American business is showing its tail lights to the rest of the

A united front and co-operative methods bring material profit to the industry, shared by all who are in it. The average price of dyes in 1917 when the United States entered the World War was domestically manufactured dyestuffs | made each year to stimulate the inwas only 42 cents per pound. Competition in the industry is very keen and lower and lower prices may be expected. Between 1925 and 1926 the knife of competition cut sixteen firms from the list of dye manufacturers. Some dyes still are imported, more than four million dollars worth coming in substantial exportable surplus. Most of our exports go to China, the

East Indies, and other non-producing countries but, in the foreign trade, the competition is very keen.

The chemical by-products of coal ar always have been a source of wonder. Our imports of dyes amounted to 4.673,196 pounds valued at \$4,103,301. Competition has become so severe that the great dye producing nations have found it necessary to divide up he world markets.

Germany, which always has had a ort of monopoly in dyes, has negotiated exclusive agreements with nese, French, and Swiss industries. But she has not recovered her trade in the bulk colors of indigo and sulphur black. Germany has a new pro-cess for liquefying coal for dye purposes and hopes to extend her foreign market by its use.

These curious products are used largely as ingredients of paint used in the laquering of automobile bodies and furniture.

The curious thing about the last named chemical is that while it is being used on the one hand in the constructive line of finishing and beautifying automobile and furniture, it is employed, on the other, in the manu facture of dynamite. Midland depends upon the three Beaver valley hospitals for use of its patients and emergency cases. Many are sent from Midland to the Rochester General hospital.

At present, all three hospitals are admittedly working under handicaps of inadequate facilities and mounting

Unless plans now under consideration for a large centralized hospital materialize, steps to relieve financial distress of the three institutions must be taken, it is believed.

According to a statement issued by the Beaver Valley Hospital commis-sion, covering the year ending May 21, 1927, the Providence hospital at Beaver Falls and the Rochester General hospital were operating at a large deficit. Although total indebtedness of the Beaver Valley hospital is not shown in the commission's statement the figures reveal an operating deficit of almost \$14,000 for that period. The Providence and Rochester hospitals also had an operating deficit.

Increasing amount of charity ser vice rendered in the three hospitals, a considerable portion of which is emergency work performed before in vestigation of patients financial status, constitutes a serious burden, it is said.

# How I make Cakes—perfect every time!

Success depends on following the recipe and method carefully. So be sure to read your recipe and method through to the end before you start to work. Then start your oven, get out all the utensils you will need and grease your pans.

When you grease them with Crisco, you do not need to flour them. Crisco contains no moisture to eause your cakes to stick to the pans and scorch. Therefore, your cakes will come out whole, with no unsightly breaks, and an even brown

Measurements must be accurate Here is a way I have found to measure shortening accurately. To measure, for example, 3/4 of a cup of Crisco, I take a measuring cup, put in 1/4 cup of cold water, then add enough Crisco to bring the water to the top of the cup, pour it off, and I have an exact 3/4 cup of

The importance of the right shortening I used to make all my cakes with but-

ter. After I began to make my cakes with Crisco, using no butter at all, I found that they were perfectly delicious and my reputation as a cakemaker was just as high as ever. When my Crisco cakes are compared with cakes made with butter, no one can tell the difference.

If you are one of those who simply find it unbelievable that you can use all Crisco in cakes, try half butter and half Crisco at first. Then next time, perhaps, three-fourths Crisco and onefourth butter. I am sure you will be so pleased with the results, that before you know it you will be using all Crisco for all your cakes.

#### Importance of creaming shortening and sugar

Not everyone realizes the importance of creaming the shortening and sugar together. The purpose is to soften the grains of sugar, and this is done by

beating the sugar with the shortening until the mixture is soft and fluffy, and does not feel grainy to the spoon.

To have your layers even and of uniform thickness, divide your batter in equal parts and spread evenly over the bottom of the pans.

#### Correct baking temperature important

Up-to-date recipes give you correct temperature. If you are an experienced cake-maker and have never used a thermometer, you, of course, have your favorite way of testing your oven for the proper heat. If not, I advise you to buy an inexpensive oven thermometer. It will be a great help to you.

If you have your own favorite cake recipes, simply use Crisco in the place of the shortening your recipe calls for, adding I teaspoon of salt to every cup

Standard Layer Cake

This recipe can be used as a standard for a variety of layer cakes. It will make a large 3-layer cake, and also six cup cakes. Or, instead of making the cup cakes, you can make four layers, making two cakes of two layers each.

% cup Crisco
I teaspoon salt

# OCTOBER GAMES IMPORTANT

# MAJOR ELEVENS IN CRITICAL CONTESTS

Dartmouth-Yale Battle S aturday Will Pack Them in; Navy-Penn, Penn State-Lafayette; Columbia-Cornell in Headliners.

By Malcolm Roy.

NEW YORK, Oct. 25-No longer does king football wait until the big games of late November to determine championship titles, for the battles which are waged nowadays on most October Saturday afternoons have assumed great importance and are just as critical as those later in the season. No longer are the October games merely exercising contests for the major elevens. For one thing more teams are in the major classification now than ever before and for another there are too few Saturdays in November for anything like the number of big games which have long since become fixtures in the schedules.

Johnny Dundee is Outfought by Youth in 15 Rounds.

NEW YORK, Oct. 25.—Youth added evitable victories today, and the name inscribed therein belongs to one who almost had the sporting world believing in the "come-back" miracle.

The name belongs to Johnny Dandee and youth is represented by Tony Canzoneri, The downfall of the fa-mous "Scotch wop" came last night at Madison Square Garden before a small crowd of about 8,800 when Tony

The crowd was with Johnny at the start and hailed him vociferously as the fighter he has always been. But when they saw him being beaten to the punch, out-maneuvered, and laughed at by his young opponent, they re-

canzoneri was too young, fast and strong for the weary Dundee. The veteran tried all his old tricks of bouncing off the ropes and attempting to bewilder his adversary by clownish but effective footwork, but Canzoneri lan plans to begin all over again; kept stabbing quick lefts and rights to throwing open all positions and send-the ison that showed we fear of Dunder. the jaw that showed no fear of Dun- ing the charges through the ground

Four damage suits against the Steu benville, East Liverpool and Beaver Valley Traction company, growing out of a collision last year between street car and an automobile in which Raymond Taylor and his family of Wellsville, were riding, have been set tled out of court, according to entries made by Common Pleas Judge W. F. Lones at Lisbon.

The accident occurred as the Tay lor automobile, turning around near Wells hollow, was struck by a street

Mrs. Taylor sued for \$20,000 damages and Taylor asked for \$15,000. Kenneth Taylor and Charles Taylor children of Mr. and Mrs. Raymond Taylor, who were in the car at the time of the accident, asked \$5,000 and \$10,000, respectively.

In the cases of the two minors, the court awarded damages of \$100 each. These two cases went to trial nominally, jury hearing being waived by both sides.

Readers of this column-if anywere told the other day it is a rea-sonable and loyal thing to believe that ever spent at her desk American teachers, whether in music or medicine, may sometimes be a good as Europeans. A reader recall Charles Clark, who became a noted baritone and teacher of voice, both it America and Europe. In Paris he spe cialized in American students. He un derstood the English language and he understood Americans, Students seem ed to think he was better than French teachers. And this young man, Charles Clark, used to be a clerk in a grist mill in Van Wert, Ohio.

ANTIQUES. Much "antique" furniture is made in Grand Rapids. Worm holes can be shot in. And the interesting point is that much modern furniture is just as good or better than antique furniture. The cult of the old-old fur-niture, old world ideas, old world teachers—is a strong cult with loyel followers. Much of the value is unreal. It is "atmosphere."

ROUGH TRUTH.

Arthur Thomson, Oxford university anatomist, wrote the "Outline of Science." He sometimes throws truth in hard rocks. They hurt. Talking be fore the Royal Academy in London the other evening he said: "It is only conceit which makes mankind believe it has not descended from the ape "He even suggested that women are physically more like the ape than man. Women's legs are usually shorter

to be ignored." And as if he hadn't said enough-this really great scientist-he declared that until a baby can walk it resembles the ape in nearly every respect.

Orators can get excited about the poor women who have to work long hours in shops and factories. Pennya-line philosophers worry a lot about the problems of the business woman. But the women who have the hardest time are the wives of workingmen who spend more hours over the wash-tub, the kitchen stove, and the bacradle than any stenographer And most wives get poor little entertainment.

Sat in a Draft-Then Suffered It's never safe to sit where a draft of air strikes the kidneys. Painful congestion, severe back-ache, and a disturbed urinal flow are sults. Mrs. C. L. B., Petersburg, Va., says, "I was so stiff and sore I could not stoop over nor rise up

great pain. Now, since taking FOLEY PILLS diuretic, I have none." A reliable valuable medicine, constantly in use over twenty-five years. Take them whenever irritations of the kidneys and bladder, and an irregular urinal flow cause distress and discomfort. Satisfaction guaranteed. Carnahan's 3

While You Hold the Line

TEW operating methods make long distance telephone service now more valuable, more satisfactory, than ever. Under the old system you placed the call

and then hung up the receiver. A short time later the operator called you back and connected you with the distant telephone.

Now, when you can give the long distance operator the distant number, she can complete the call while you hold the line.

The value of this fast service is readily seen. Business men can conduct their outof-town affairs by telephone just as easily as they talk to associates in their own offices, or call people in their own city. Friends and families are put in almost immediate touch with one another. The whole country is closer together.

# DRINK WATER TO HELP WASH OUT KIDNEY POISON

If Your Back Hurts or Bladder Bothers You, Begin Taking Salts.

When your kidneys hurt and your back feels sore don't get scared and proceed to load your stomach with a lot of drugs that excite the kidness and frritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flusting them with a mild, harmless salts which helps to remove the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of good water—ven can't

frink too much; also get from any pharmacist about four ounces of Jad Balts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys may then act fine. This famous salts is made from the acid of graves and lemon juice, combined with lithia, and has been used for years to help clean and stimulate clogged kidneys; also to neutralize the acids in the system so they are no longer a source of irrita tion, thus often relieving bladder weakness.

Jad Salts is inexpensive; cannot in-jure; makes a delightful effervescent lithia-water drink, which everyone should take now and then to help keep their kidneys clean and active. Try this; also keep up the water drinking and no doubt you will wonder what became of your kidney trouble and

# GENERAL ELECTRIC Refrigerator

You will bless the General Electric Refrigerator for the way it lightens household tasks. It makes two trips to market take the place of six. It keeps all foods at just the right temperature. It makes the preparation of those delightful salads and desserts a matter of minutes instead of hours. It never needs attention—not even oiling.

As you examine this refrigerator you will notice that it has no drain-pipes. belts, fans, or stuffing boxes to get out of order. That its shelves are generously roomy. That it is unusually quiet. That it is portable. That all its moving parts—with a permanent supply of oil-are enclosed in a single hermetically sealed casing. All these advantages are the result of fifteen years of painstaking research by the General Electric Company.
